

# Treffpunkt AMMO

## Mop or Dog

Automation is a thriving topic in today's businesses. Automated processes are much more stable, reliable, scalable and most of all cheaper. Machine Learning can be used as a tool to drive business automation and develop solutions for the more complex automation processes. Businesses are now starting to see this opportunity and start building such solutions. We would like to take you on a journey of multiple machine learning use-cases and projects developed to drive business automation and to present solutions in place and some common struggles when developing such solutions.

**Donnerstag**  
**10. Januar. 2019**  
**14:00 Uhr**

**Interaktion 1**
